

# Makes Moving Full Files an Easy Job . . .

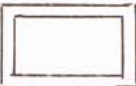

## AMAZING NEW LIFT-A-FILE®

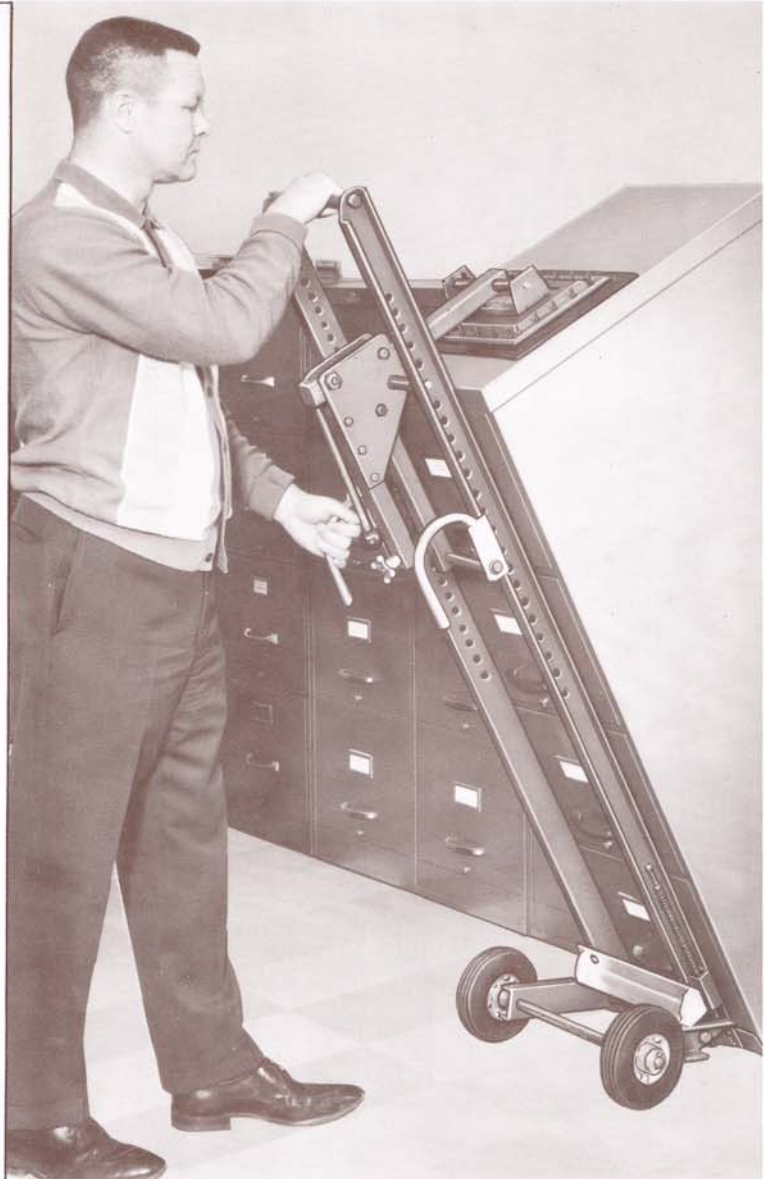

Move Fully Loaded Files Easily  
from Walls, Across Thresholds,  
In and Out of Groupings . . .  
*Quickly, Safely and Easily!*

Now . . . new LIFT-A-FILE with its patented vacuum cup and cantilever action makes a simple, one-man job of moving any loaded filing cabinets . . . *without removing drawers!*

**HOW IT WORKS:** At the touch of the hand, the double-acting suction cup firmly grasps and holds top of filing cabinet. A short downward movement of the lever arm automatically raises cabinet off of floor onto structural frame of truck. Then, simply lower truck into rolling position by pivoting load on front toe of truck, roll cabinet into its new position, lower it to the floor and roll truck away.

### OUTSTANDING FEATURES:

- LIFT-A-FILE easily adjusts to any file cabinet up to 64" high — legal or letter size.
- Easily handles loads up to 500 pounds.
- Solid rubber tires ride on Ball Bearings — permits truck to ride over vinyl or carpeted floor.
- Neoprene vacuum plate grasps and lifts file cabinet from top surface, holds it firmly, safely in place.
- Sturdy, all-steel design.
- Lightweight (approximately 55 lbs.) makes it easy to roll about in office.
